# Global Corporate Strategy: 2026

Executive Summary:
The core takeaway from the latest regional analysis is that Vintage Cars are structurally becoming much more expensive to maintain and ship, whereas Classic Cars remain highly profitable and drive 80% of European retention. We strongly advise pivoting our discretionary marketing budget exclusively towards Classic Cars heading into Q4.

Key Strategy Factors:
1. The Scandinavian market is showing explosive growth potential for scaled motorcycle distribution.
2. Supply chain disruptions in the Mediterranean have severely impacted our delivery timelines.

Recommendations:
Focus on North American expansion and double down on high-margin product lines. Specifically, marketing should target high-net-worth clients for the upcoming "Motorcycle Expo 2026".
